<u>**Position:**</u> **Junior Web Developer**

>> What We Are Looking For

Optrics Engineering is seeking an individual for the position of *Junior Web Developer*. The successful candidate should be willing to learn all that it takes to be successful as a Junior Web Developer as well as come with the following traits/skills:

Responsibilities:
- Participate in all aspects of web development for multiple websites (design, maintenance, implementation)
- Be constantly aware of website performance, metrics, and audience
- Keep up to date on current SEO/SEM best practices and web standards

Desirable Skills:
- Good time management in a fast-paced environment
- Ability to keep task oriented and work within deadlines
- Understanding of what makes a website excellent: appearance, ease of use, scalability, etc.
- Some experience with the following web technologies: CSS, Javascript, ASP, ASP.net, DHTML
- Experience with Visual Studio.net would be an asset
- Understanding of databases (Access/SQL Server)

Qualifications:
- Diploma or degree in Website Application Development, Computer Programming, or other related field
- Minimum 1-year experience in web development and associated technologies

Our Environment: The work environment is professional, relaxed and centered around working as a team ensuring that everyone feels included in the success of the company. Our primary corporate goal is offering excellence in solutions to our clients versus making a buck. We let the bottom line look after itself while we look after the customer and it is a business model that works very well. Pursue excellence and the world will beat a path to your door and reward you appropriately.

If this position interests you then we would like to talk.

>> About Us

Optrics Engineering is a professionally-licensed engineering firm and full-service network systems integrator as well as a Value Added Reseller of network and network-related software and hardware solutions. We deal with leading-edge technologies centered around the network-monitoring, network-security and network-application space.

Our Solutions: Our solutions include secure-FTP and mail servers, VPN, firewall and load-balancing appliances, network-performance trending and notification, intrusion detection and physical-monitoring solutions to mention just a few. [Please review www.Optrics.com for more specific details on our many partner companies.] We offer presales consulting, system-and-solution design, product procurement, installation and setup services, training, technical support and maintenance services.

Optrics offers professionally-designed solutions to clients seeking results, not just "boxes" or boxes at the lowest possible buck. There is no reward or satisfaction in pursuing mediocrity.

Our Customers: Our customer base is global but centered in North America with a strong US presence. We sell to all major verticals from health care to military, education, manufacturing, aerospace, finance, and from small firms of just a few employees to Fortune 100 companies. Our customers include well-recognized names like Ratheon, Microsoft, Telus, George Mason University, USAF, US Navy, NASA, Hewlett-Packard, Varian Medical, Lockheed Martin, Bell Canada, HSBC, General Dynamics, Bonneville Power Corp, Sick Children's Hospital in Toronto and many, many more. Repeat customers are the foundation of our business and new customers our source of growth. Our customers are typically seasoned IT professionals seeking results who realize the value of expertise backed by first-class service.
