ManageEngine
ExchangeReporter Plus
A Complete MS Exchange Reporting Software

“ Finding out mailbox sizes was very cumbersome and difficult. ExchangeReporter Plus was the only solution that gave us mailbox size and group information within our budget. ”

Renee Davis, Chief Information Officer at
Life Management Center, Florida

“ We needed granular reporting on Exchange to get a better understanding of the environment itself, so that we could begin to change various projects for this core service use. Exchange Reporter Plus gave all this - without having to depend on powershell scripting. ”

Shannon Rubin, IBTS (Institute for Building
Technology and Safety)

ExchangeReporter Plus

AN EXCLUSIVE
REPORTING SOLUTION
FOR ALL YOUR
MS EXCHANGE
REQUIREMENTS

ExchangeReporter Plus is a ready-to-deploy change auditing & reporting solution for MS Exchange environment

WHY EXCHANGEREPORTER PLUS?

Convenient Dashboard

The product dashboard offers a panoramic view of integral information like Exchange audit alerts, server storage usage, top mailboxes by size, Exchange mail traffic summary and server traffic summary presented in the form of tabulations and graphs.

Value

ExchangeReporter Plus is high on value and low on price. The pricing starts at just \$295 and packs several insightful reporting solutions for your everyday MS Exchange management.

Easy Deployment

ExchangeReporter Plus is a ready-to-deploy reporting and analysis solution for your Exchange servers. The deployment is simple, easy and takes the littlest of your time.

Alert

Configure alerts for events that require your immediate attention and get notified on the same with the alert feature.

Filters

Filters in the reports help you narrow down the data to the specifics you're looking for, like events on particular dates or hourly email traffic summary on a specific day.

Convenient Export Options

Export the reports to various formats including CSV, PDF, XLS and HTML.

Customizable Views

Exchange auditing is exceedingly customizable. Create your own view for any of the audit reports in a few simple steps.

Fully functional 60-day trial

The installed product works in trial mode that is fully functional for 60 days! Even after trial period is over, previously fetched reports can be referred to and reused.

ExchangeReporter Plus is available in two versions

- » Standard
- » Professional

The "Quick Find" option allows you to easily find data you are looking for from a report by providing one or multiple inputs!

HOW DOES IT WORK?

Exchange related information is gathered from the Exchange servers, Active Directory, Message Tracking Logs, and IIS logs. This data is gathered with the help of scheduled data gathering tasks configured in the product. When a user runs a report in ExchangeReporter Plus, relevant information stored in the product database is fetched and presented neatly in a tabulated form with graphs if required. On the other hand, auditing is real-time, where the product fetches data or raises alerts as soon as an event is captured in the domain controller or Exchange server.

Dashboard View

100+ REPORTS

ExchangeReporter Plus can help you know your mailboxes better

The mailboxes reports keep you abreast of

- » Mailbox size
- » Email content
- » Permissions associated with mailboxes
- » Account status
