

WatchGuard Security Appliances

When companies need proven network security solutions they turn to WatchGuard. We provide excellent reliability, service, support, and innovation for our customers, with a wide range of products to suit their specific business requirements.

WatchGuard® XTM Series

XTM security appliances are a new class of performance-driven solutions. Blazing fast throughput combines with advanced networking features to handle high-volume traffic securely – and at an affordable price.

Flexible management tools allow IT administrators to manage security through an intuitive centralized console, scriptable command line interface, and web UI. Interactive, real-time monitoring and reporting are included at no additional charge. There are fifteen models to choose from to support businesses of all sizes, from fewer than 50 users to 10,000 or more.

WatchGuard XCS Series

WatchGuard XCS solutions deliver the industry's best defense-in-depth against email-borne threats while blocking over 98% of spam. All models include powerful data loss prevention (DLP) capabilities that inspect outbound email to ensure sensitive data is not inadvertently distributed against policy direction. A Web Security subscription extends that protection to all web traffic, allowing you to manage security across protocols from a single point of administration. There are six models to choose from to support businesses of all sizes, from 250 or fewer users up to large enterprises.

Especially suited for larger organizations and managed or hosted service providers, the WatchGuard Quarantine Management Server (QMS) can be easily combined with an XCS appliance as a dedicated off-load point for unwanted email. QMS supports up to 180,000 users.

WatchGuard® SSL

WatchGuard® SSL appliances are affordable, easy-to-use secure remote access solutions that provide reliable client and clientless connectivity to corporate data and resources. Users stay productive from anywhere, anytime. For small to mid-size businesses with up to 500+ concurrent remote users.

The WatchGuard® XTM Story

Since 1996, WatchGuard Technologies has provided over half a million network security appliances to hundreds of thousands of customers worldwide. We take pride in the reliability of our products and the ROI they bring to our customers. Our WatchGuard XTM 2, 5, 8, and 10 Series security solutions deliver performance-driven security at an affordable price to businesses of all sizes. Powerful security capabilities unify threat management across protocols. Advanced networking features include active/active high availability with clustering, VLAN support, dynamic routing, and multi-WAN server load balancing to handle high-volume traffic. For flexible management and granular control, IT administrators have an intuitive centralized console, command line interface, and web UI, with real-time monitoring and rich reporting included at no additional cost. These all-in-one solutions deliver enterprise-grade network protection in a cost-effective, extensible solution.

Boost Protection in Critical Attack Areas

WatchGuard firewalls are built on robust "Layer 7" content inspection technology, which is fundamentally more secure than stateful packet filtering. Integrated security subscriptions deliver additional layers of protection, without requiring additional hardware purchases. Subscriptions include:

- **Application Control** to keep users on the tasks that matter
- **Reputation Enabled Defense** for faster, safer web surfing
- **spamBlocker** with virus outbreak detection
- **WebBlocker** for URL filtering on HTTP and HTTPS
- **Gateway AntiVirus** with anti-spyware
- **Intrusion Prevention Service** with comprehensive attack protection across all ports and protocols

Easy to Upgrade

As business needs grow, it's easy to protect your security investment. Add new capabilities to enhance protection or upgrade to a higher model in the line for more performance or capacity using a simple downloadable license key.

Buy the Bundle and Get the Works

The easiest, most cost-effective way to have complete network protection is with the WatchGuard Security Bundle. An exceptional value, the Bundle includes:

- Choice of any WatchGuard XTM appliance
- Full suite of security subscriptions
- LiveSecurity Service for support and maintenance

One-year, two-year, and three-year subscription packages available

Expert Guidance and Support

LiveSecurity Service from WatchGuard provides technical support with a targeted four-hour response time, and a hardware warranty that covers advance hardware replacement. It includes free software updates so code is always up to date. Concise threat alerts are delivered with clear instructions on how to reduce or eliminate new threats and link directly to vendor patches to save time. Ground-breaking security education tools include videos and podcasts. No other security vendor does as much to educate customers in the role of security-savvy network administrator.

Support and Maintenance											
LiveSecurity® Service	XTM 2 Series has initial 90-day, 1-year, 2-year, and 3-year LiveSecurity subscriptions available			XTM 5, 8, and 10 Series appliances have initial 1-year, 2-year, and 3-year LiveSecurity subscriptions – LiveSecurity Plus, Gold, and Platinum level service are available as a purchase upgrade							

No matter which XTM appliance you choose, you'll enjoy:

Security Features

- Stateful packet firewall, deep application inspection, application proxies: HTTP, HTTPS, SMTP, FTP, DNS, TCP, POP3
- Blocks spyware, DoS attacks, fragmented packets, malformed packets, blended threats and more
- Protocol anomaly detection, behavior analysis, pattern matching
- Static and dynamic blocked sources list
- Time-based rules
- Instant messaging, P2P, and Skype allow/deny
- VoIP: H.323 and SIP, call setup and session security

Security Subscriptions

Available in 1-, 2-, and 3-year subscriptions

- spamBlocker
- Application Control
- Reputation Enabled Defense
- WebBlocker
- Gateway AntiVirus
- Intrusion Prevention Service

Buy an XTM Bundle and get all subscriptions plus appliance and support and maintenance contract at a great price.

Management Software

All WatchGuard XTM appliances can be managed with the IT administrator's choice of:

- Command line interface with direct connects and scripting
- Web UI for access to management tools from anywhere
- WatchGuard System Manager (WSM) – an intuitive, centralized console that provides interactive real-time monitoring and logging for network-wide system status at a glance. Includes drag-and-drop VPN creation and rich historical reporting

User Authentication

- Transparent Active Directory Authentication (single sign-on)
- XAUTH for Radius, LDAP, Secure LDAP, Windows Active Directory
- RSA SecurID® and VASCO
- Web-based, local
- 802.1X for XTM 2 Series wireless
- Microsoft Terminal Services and Citrix

Logging and Reporting

- Multi-appliance log aggregation
- HTML and PDF reports
- SQL log database
- Encrypted log channel
- SNMP v2 & v3
- Syslog
- Logging and reporting with server health status
- Web-based configurable reports portal

*All XTM 2 Series appliances are available in a wireless version, under model numbers XTM 21-W, 22-W, and 23-W. **Throughput rates will vary depending on environment and configuration. Contact your WatchGuard reseller or call WatchGuard directly (1.800.734.9905) for help determining the right model for your network. ***Maximum number available with upgrade to Fireware XTM Pro advanced OS. †XTM 830 appliances come with 6 copper and 4 fiber 10/100/1000 interfaces under model number WatchGuard XTM 830-F. †Requires Fireware Pro upgrade on XTM 21, 21-W, 22, and 22-W appliances.
