

WatchGuard® XCS Security Appliances

When companies need proven protection from email and web threats, and prevention of data loss for privacy and compliance, they turn to WatchGuard XCS solutions. These solutions provide the most comprehensive and proactive security from threats across email and web in the industry, with consolidated visibility and control of your email and web traffic.

WatchGuard® XCS 770, 770R, 970, and 1170 Appliances Complete Messaging Security & Data Loss Prevention Mid-Sized to Large Enterprises & ISPs, Global 2000 and Fortune 500 Companies

Designed with the most demanding messaging networks in mind, WatchGuard® XCS 770, 770R, 970, and 1170 XCS appliances are easy-to-use, unified email security, privacy, and compliance solutions. They protect against inbound email threats and control outbound information to prevent data loss. Your network has protection from spam, viruses, malware, blended threats, spyware, phishing, and network attacks. Automated content security controls and stops data leakage, ensuring that the content of outgoing messages is in strict accord with your organization's confidentiality and regulatory compliance policies. Centralized administration and reporting reduces costs and management requirements, and provides total visibility and control of incoming and outgoing email traffic.

WatchGuard XCS Web Security Subscription

Unify your email and web security and extend your messaging security boundary with a WatchGuard® XCS Web Security Subscription. Available for all models, this subscription provides extensible content security to stop web threats before they can enter your network, prevent data loss across web channels, and protect beyond basic URL filtering with dynamic inspection of web destinations. It integrates controls for acceptable and application use of the Internet, as well as critical web traffic enhancements to reduce bandwidth consumption. This includes cloud-based web reputation services, powered by Reputation Enabled Defense, for protection from malicious or compromised URLs at the perimeter. The result is a less expensive, more secure, and better performing network.

WatchGuard® XCS 170, 370, and 570 Appliance Inbound/Outbound Email Security & Data Loss Prevention

Small to Mid-Sized Businesses - up to 1,000 users

Looking for complete protection against spam, viruses, and malware without the hefty price? WatchGuard XCS 170, 370, and 570 appliances deliver the most advanced email security on the market, providing powerful anti-spam, anti-virus, and threat prevention in one easy-to-use appliance. A defense-in-depth approach offers the highest spam blockage rate in the industry (more than 98%) and protection from viruses, blended threats, spyware, and more. Data Loss Prevention is built into all appliances as a powerful business tool for controlling confidential information as it moves across network boundaries.

WatchGuard® XCS SecureMail Email Encryption Subscription

This is an easy-to-use, secure envelope technology for enterprises that do not want the burdens and costs associated with traditional encryption solutions. Provides reliable business-class email encryption for instant and transparent protection of sensitive information in-transit. Available for all WatchGuard XCS security appliances.

WatchGuard® Quarantine Management Server (QMS) Off-load spam & suspect email efficiently and effectively

Small to Large Enterprises and MSSPs/Hosted Services can now take advantage of WatchGuard's QMS as either a hardware appliance option, or as a free virtual appliance* (VA) download as part of your subscription to our LiveSecurity support program. QMS provides a secure, dedicated holding area for suspect messages, freeing your email servers to process only legitimate, wanted email traffic. Supports multiple domains, organizations, and users. Works with all WatchGuard XCS email security appliances.

*Visit www.watchguard.com/qmsv for specifications and benefits.

The WatchGuard® XCS Story

Since 1996, WatchGuard Technologies has provided more than 600,000 security appliances to hundreds of thousands of customers worldwide. Our newest family of products, the WatchGuard Extensible Content Security (XCS) solutions, deliver

the industry's best defense-in-depth security for email, web, and data loss prevention to provide an extensive risk management boundary. With seven models to choose from, XCS appliances meet the messaging security requirements of businesses of all sizes, including solutions to protect the world's most demanding email and web networks. All XCS products are backed by LiveSecurity® Service, a high-value support and maintenance program. The WatchGuard commitment to performance and value gives our customers enterprise-grade protection in a cost-effective, extensible solution.

Stronger Security With Multi-Protocol Protection

WatchGuard XCS appliances provide extensible content security for email and web applications. They deliver unprecedented protection and control of traffic entering and exiting your email and web networks. Protect your network's perimeter with a combination of defenses:

- **WatchGuard Reputation Enabled Defense** "in-the-cloud," real-time monitoring service to block over 98% of unwanted traffic and threats at the perimeter with 99.9% accuracy
- **Advanced Spam and Malware Prevention Engines**
- **Zero-Hour Threat Outbreak Response** for the fastest response to new threats
- **Always-On Email Security** so you never lose a message
- **Set-It-And-Forget-It Administration** with the ability to apply a single policy to control traffic
- **Granular Reporting** for visibility into security gaps and customizable reporting for audit requirements

Data Loss Prevention

Data Loss Prevention capabilities are included with all XCS models. This extends protection from data leakage to all outbound communications for greater security, privacy, and regulatory compliance.

Eliminate Security Gaps with Security Subscriptions

Integrated security subscriptions deliver even more layers of protection, without requiring additional hardware purchases. Increase your security with:

- **XCS Web Security Subscription** to extend your messaging security boundary across email and web. Secure and control web traffic and internet usage with powerful protection from web-based threats, malware, and data leakage across web mediums.
- **XCS SecureMail Email Encryption Subscription** for seamless protection of confidential and sensitive email communications without the high costs often associated with email encryption.

Expert Guidance and Support

LiveSecurity Service from WatchGuard provides technical support with a targeted four-hour response time, and a hardware warranty that covers advance hardware replacement. It includes free software updates so code is always up to date. Concise threat alerts are delivered with clear instructions on how to reduce or eliminate new threats and link directly to vendor patches to save time. Ground-breaking security education tools include videos and podcasts. No other security vendor does as much to educate customers in the role of security-savvy network administrator.
